To rejuvenate, beautify, and protect your metal surfaces, we recommend you follow the step by step Killrust system shown below.

**Killrust System Guide**

**SURFACE TYPE/CONDITION**
- Previously painted in good condition.
- Steel or wrought iron, new, unpainted.
- Steel or wrought iron, rusted.
- Clean, rust free steel in easy to reach places.
- Steel in difficult to reach places.
- Galvanised iron, Zincalume®.
- Galvanised iron, Weathered.
- Aluminium, copper etc.

**PREPARE**
- Sand surface lightly until dirt, dust is removed; remove dust after sanding; must be treated with Blastex then mixed with clean water.
- Clean surface to remove oil, grease and rust scale.
- Clean surface to remove old paint, grease and rust scale.
- Clean surface to remove oil and grease.
- Clean surface to remove oil and grease.
- Remove corrosion salts from galvanised iron.
- Remove all corrosion salts from metal, clean steel, and difficult to reach surfaces.

**PRIME**
- No priming required.
- Apply Killrust Metal Primer.
- Apply Killrust Galvanised Iron Primer.
- Apply Killrust Galvanised Iron Primer.
- Apply Killrust Super Etch Primer.
- Apply Killrust Super Etch Primer.

**TOPCOAT**
- Apply Killrust Superior Protection Epoxy Enamel.
- Apply Killrust Superior Protection Epoxy Enamel.
- Apply Killrust Superior Protection Epoxy Enamel.
- Apply Killrust Superior Protection Epoxy Enamel.
- Apply Killrust Superior Protection Epoxy Enamel.

**Step 1: Prepare**

The Killrust range of preparatory products provide superior solutions for preparing rusted metal, clean steel, and difficult to reach surfaces.

**Killrust Rust-Eater®**
- For use on wrought iron and other ferrous metals, clean steel, and difficult to reach surfaces.
- For use on new and weathered metal gates, metal railings and other general structural steelwork.

**Killrust Cold Galvit**
- For use on metal fences, gutters, gates, railings, down pipes and other general metal coating applications.
- Provides oxidation protection on bare metal.
- Excellent adhesion properties provide a sound base for top coating.

**Killrust Fishoileene**
- An anti-corrosive protective built for natural and remaining steel.
- Ideal for use in hard to reach areas like pipes, strainers, gulleys, nuts, bolts and other structural steelwork.

**Killrust Metal Prep**
- Ideal for hard to reach areas - cracks, crevices, along pipes, nuts, bolts, hinges and welds.
- Ideal for use on new and weathered metal gates, metal railings, walkways and other general structural steelwork.

**Step 2: Prime**

Killrust primers contain rust inhibiting pigments to chemically fight rust and create a protective barrier. Excellent adhesion properties provide a sound base for top coating.

**Killrust Metal Primer**
- A high-performance anti-corrosive primer.
- Formed a tough and flexible coating to resist corrosion, even in the harshest of environments.
- Provides excellent adhesion to aluminium, stainless steel and other non-ferrous metals.
- For use on aluminium windows, doors, gutters, fences, gates, railings, down pipes and other general structural steelwork.

**Killrust Super Etch Primer**
- A fast-drying, anti-corrosive primer.
- Provides excellent adhesion to aluminium, stainless steel and other non-ferrous metals.
- For use on aluminium windows, doors, gutters, fences, gates, railings, down pipes and other general structural steelwork.

**Killrust Galvanised Iron Primer**
- An all-purpose high-performance coating for metal Primer.
- Provides corrosion protection and ensures long-term protection.
- For use on new and weathered galvanised iron and structural steel.

**Step 3: Topcoat**

The range of Killrust topcoat products is designed to provide superior protection when used in accordance with the Killrust System Guide.

**Killrust Superior Protection Epoxy Enamel**
- An advanced anti-corrosion epoxy formula.
- Protects against wet and dry corrosion.
- Provides excellent adhesion to aluminium, stainless steel and other non-ferrous metals.
- For use on metal fences, gutters, gates, railings, down pipes and other general metal coating applications.
