Protection solutions for metal surfaces

# Wattyl Killrust System Guide

To rejuvenate, beautify, and protect your metal surfaces, we recommend you follow the step by step *Wattyl Killrust* system shown below.

SURFACE TYPE/CONDITION	PREPARE	PRIME	TOPCOAT
Previously painted <i>in good condition.</i>	Sand surface lightly until gloss is removed; remove dust. Any mould spots must be treated with bleach, then rinsed with clean water.	No priming required.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Steel or wrought iron. <i>New, unpainted.</i>	Clean surface to remove oil, grease and mill-scale.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Steel or wrought iron. <i>Rusted.</i>	Wire brush, scrape or sand surface to remove rust and any loose, peeling or flaking paint. Apply <i>Killrust</i> Rust-Eeter® to rusted areas.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Clean, rust free steel in severe sites. <i>New, unpainted.</i>	Clean surface to remove oil, grease and mill-scale. Apply <i>Killrust</i> Cold Galvit.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Steel in severe sites. <i>Rusted, unpainted.</i>	Remove all rust by wire brushing, scraping, sanding or grinding back to bright metal. Apply <i>Killrust</i> Cold Galvit.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Steel in difficult to reach places.	Wire brush, where possible, scrape or sand surface to remove any loose, peeling or flaking paint. Apply <i>Killrust</i> Fishoilene.		
Galvanised iron, Zincalume®. <i>New.</i>	Clean surface to remove oil and grease.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Galvanised iron, Zincalume®. <i>Weathered.</i>	Remove corrosion salts from galvanised iron with a stiff bristle brush or nylon scourer and water.	Apply <i>Killrust</i> Heavy Duty Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.
Aluminium, copper etc.	Remove all corrosion, peeling and flaking paint by wire brushing, scraping or sanding. Clean surface to remove oil and grease.	Apply <i>Killrust</i> Super Etch Primer.	Apply <i>Killrust</i> Epoxy Gloss Enamel.

# Understanding the *Wattyl Killrust* 3 Step System

*Wattyl Killrust* has been specifically formulated to offer the ultimate in metal protection through the *Wattyl Killrust* 3 step system. This system will protect, rejuvenate and beautify your metal surfaces by following the 3 easy steps.

*Wattyl Killrust* offers superior solutions for preparing rusted metal, clean steel and difficult to reach surfaces.

The *Wattyl Killrust* preparatory range provides superior solutions for preparing rusted metal, clean steel and difficult to reach surfaces. The result is a stable metal surface which is better prepared for topcoating.

*Wattyl Killrust* primers enhance adhesion and inhibit rust to fight corrosion and create a protective barrier for greater metal protection.

The *Wattyl Killrust* primer range contains rust inhibiting pigments to chemically fight rust, whilst also forming a protective barrier. They have excellent adhesion properties and provide a sound base for topcoating.

The range of *Wattyl Killrust* colours in Gloss Enamel are designed to provide a superior finish.

A range of corrosion inhibiting enamels that provide a tough, flexible coating with excellent durability properties. A wide range of colours including Colorsteel® *Wattyl Killrust* topcoats can be used indoors or outdoors and, with the correct primer/undercoat, can even be used on timber, brick, fibre cement, concrete and other surfaces. **No primer is required for new or lightly rusted steel or iron surfaces.**

**When metal protection really matters, you can always trust *Wattyl Killrust***

# Wattyl Killrust – The superior system for the protection of metal surfaces

The *Wattyl Killrust* System makes painting metal an easy three step process. The system is specially formulated to rejuvenate, beautify, and protect your metal surfaces.

## Step 1: Prepare

### *Killrust Rust-Eeter®*

- Converts rust to stop corrosion
- Provides a suitable surface for subsequent priming and painting
- For use on wrought iron and ferrous metal surfaces
- Not for use on galvanised iron

### *Killrust Cold Galvit*

- Zinc-rich cold galvanising primer for long-term, extra heavy duty corrosion protection
- Encapsulates the metal in a zinc film
- Ideal for use on clean, rust free steel in highly corrosive environments such as coastal regions
- For use on steel handrails, balustrading and other structural steelwork

### *Killrust Fishoilene*

- An anti-corrosive protective fluid for rusted steel where normal surface preparation is difficult
- Ideal for hard to reach areas - cracks, crevices, along pipes, nuts, bolts, hinges and welds
- Cannot be overcoated

## Step 2: Prime

### *Killrust Heavy Duty Primer*

- A high performance, anti-corrosive primer
- Forms a tough and flexible coating to resist corrosion, even in the harshest of environments
- For use on new and weathered galvanised iron and Zinalume® roofs, wrought iron railings, gutters, downpipes and general structural steel work

### *Killrust Super Etch Primer*

- A fast drying, anti-corrosive primer
- Provides excellent adhesion to aluminium, brass, copper, stainless steel, zinc and lead surfaces
- For use on aluminium windows, doors, gutters, fences, gates, railings, down pipes

## Step 3: Topcoat

### *Killrust Epoxy Gloss Enamel*

- An advanced anti-corrosive epoxy formula
- Provides excellent durability and maximum metal superior protection in an attractive gloss finish
- Apply directly to new and lightly rusted steel wrought iron surfaces without priming
- For use on metal fences, gutters, gates, railings, down pipes and other general metal coating applications
